

Specification Sheet

« Aerial Silk »

Duration: 6 minutes

Rigging height:

One secure rigging point between **6 and 8 meters** (20 to 26 feet) above ground level (grid, truss, gantry, crane, etc.).

Equipment:

One soft safety mat to be placed under the aerial silk (approximately **2 × 2 m** and **20 cm thick**), similar to those used in schools, dojos, or gymnasiums. The mat can be covered with black fabric if needed.

Sound:

A sound system with playback capability (CD player or USB drive) and **one person to cue the music**.

Setup time:

Approximately **30 minutes**.

Immediate setup between two acts is possible if the silk can be pre-rigged and lowered.

Dressing room:

A private space available at least **30 minutes before the performance**, with refreshments.
